

## PEL-BOND

**Pel-Bond** is an activated bentonite which find application as a binding agent for most ore pelletising applications.

### FEATURES

Rapid bond development  
(>90% within 3 minutes)

Good green and fired pellet strength

### BENEFITS

Reduces pellet breakage  
and dust formation

### TYPICAL PROPERTIES

Cation exchange capacity	>75 meq/100g
Moisture	8-15%
Grading retained	<10% on 75um
pH	10-10,5
Swelling volume	22 – 26 (ml/2g)
Viscosity (Baroid funnel, 5% suspension)	24 – 38 (immediate)
Water absorption porous plate	>580%

**PACKAGING:** Road tanker (Product code 0144)
